PRECAUTIONARY STATEMENTS

PREVENTION

P201 Obtain special instructions before use.
P202 Do not handle until all safety precautions have been read and understood.
P264 Wash skin thoroughly after handling.
P280 Wear protective gloves/ protective clothing/ eye protection/ face protection.
P281 Use personal protective equipment as required.

RESPONSE

P302+P352 IF ON SKIN: Wash with plenty of soap and water.
P362 Take off contaminated clothing and wash before reuse.
P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P308+P313 IF exposed or concerned: Get medical advice/ attention.
P332+P313 If skin irritation occurs: Get medical advice/ attention.
P337+P313 If eye irritation persists: Get medical advice/ attention.
P321 Specific treatment (see section 4 on this SDS).

STORAGE

P405 Store locked up.

DISPOSAL

P501 Dispose of contents/container in accordance with applicable regional, national and local laws and regulations.

READ THE ENTIRE SDS FOR MORE THOROUGH EVALUATION OF THE HAZARDS

### SECTION 4: FIRST AID MEASURES

**EYE:**
In case of contact with the eyes, flush eyes with plenty of lukewarm water. Use fingers to ensure that the eyelids are separated and that the eye is being irrigated. Get medical attention if irritation develops.

**SKIN:**
In case of skin contact, wash affected areas with soap and water. Immediately remove contaminated clothing and shoes. Call physician if irritation develops or persists. Thoroughly clean shoes before reuse.

**INHALATION:**
If inhaled, remove to fresh air. If breathing is difficult, give oxygen. If not breathing, give artificial respiration. Get medical attention.

**INGESTION:**
If ingested, do not induce vomiting unless directed to do so by medical personnel. Get medical attention.

**NOTES TO PHYSICIAN:**
Symptomatic and supportive therapy as needed. Following severe exposure, medical follow-up should be monitored for 48 hours.

### SECTION 5: FIRE FIGHTING MEASURES

**FLASH POINT:**
Not available.

**HAZARDS WHEN ON FIRE OR NEAR FLAME:**
May produce toxic fumes of carbon dioxide, carbon monoxide, nitrogen oxides, (dense) black smoke, aldehydes, organic acids, nitrogen oxides, ammonia, and/or amines when near heat source/flame. When in a closed container, pressure will increase which may lead to a rupture of the container.

**SUITABLE EXTINGUISHING MEDIA:**
Dry water, foam, or dry chemicals to extinguish.

**UNSUITABLE EXTINGUISHING MEDIA:**
Not available.

**SPECIAL EXPOSURE HAZARDS:**
Vapors are heavier than air and may travel a considerable distance to a source of ignition and flashback. Vapors or fumes may foam explosive mixture with air.

**SPECIAL PROTECTIVE EQUIPMENT FOR FIRE FIGHTERS:**
Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. PVC boots, gloves, safety helmet and protective clothing should be worn.

**HAZARDOUS DECOMPOSITION:**
Combustion of product will lead to oxides of nitrogen, carbon dioxide, and carbon monoxide being produced.

### SECTION 6: ACCIDENTAL RELEASE MEASURES

**ACCIDENTAL RELEASE MEASURES:**
For major spills call CHEMTREC. Toll free 1-800-424-9300 for international call 1-703-527-3887.

**PERSONAL PRECAUTIONS:**
Wear appropriate personal protective equipment recommended in SECTION 8: EXPOSURE CONTROL/PERSONAL PROTECTION of this SDS. Immediately contact emergency personnel. Evacuate the area. Keep upwind avoiding inhalation of vapors. Clean-up should only be performed by trained personnel. People dealing with major spillages should wear full protective clothing including respiratory protection.

**ENVIRONMENTAL PRECAUTIONS:**
This material may contaminate the environment without proper control and response to spills. Ensure spilled material does not come in contact with soil, waterway, drains, sewers, or other runoff that would further disperse the material. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil, or air). Sources of ignition should be kept clear.

**METHODS FOR CONTAINMENT:**
Use diking or capping to control migration. Contain and absorb large spillages with a non-flammable absorbent carrier (such as vermiculite, earth, or sand). DO NOT USE combustible materials such as sawdust. Shovel into open-top drums or plastic bags for further decontamination, if necessary. Remove and properly dispose of residues. Dispose of via a licensed waste disposal contractor (See SECTION 13: DISPOSAL CONSIDERATIONS). Notify applicable government authorities if release is reportable.

**METHODS FOR CLEANING UP:**
Only proceed with clean up by taking the appropriate personal protection measures required and ensure surrounding area does not contain further hazards that could worsen the spill, cause migration, or cause further harm (i.e. eliminate any ignition sources). Move any non-contaminated, non-leaking containers from the spill zone if it can be done safely. Dike, dam, or further restrict and stop active leaks without posing further damage or harm to individuals, the environment, and/or structures. Contain and collect spillage. See SECTION 13: DISPOSAL CONSIDERATIONS for disposal information and SECTION 8: EXPOSURE CONTROL/PERSONAL PROTECTION for recommended Personal Protective Equipment (PPE). Obey all local, state, and federal regulations during clean up.
SECTION 7: HANDLING & STORAGE

GENERAL: Ideal storage temperature is 41-104°F (5-40°C). Handling and storage shall be in accordance with local, state/provincial, or federal regulations.

HANDLING: Avoid eye contact, repeated or prolonged skin contact or inhalation of aerosol, mist or vapors. (See SECTION 8: EXPOSURE CONTROL/PERSONAL PROTECTION for details). Wash thoroughly after handling.

STORAGE: Keep container tightly closed and properly sealed when stored. When possible, store product indoors in a dry, well-ventilated area. Store in original container protected from direct sunlight, away from incompatible materials, and away from food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers and use appropriate containment to avoid environmental contamination.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

EXPOSURE LIMITS:

<table>
<thead>
<tr>
<th>COMPONENT NAME</th>
<th>CAS NUMBER</th>
<th>EXPOSURE LIMITS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dipropylene glycol dimethyl ether</td>
<td>111109-77-4</td>
<td>ACGIH TLV TWA: 20 ppm</td>
</tr>
<tr>
<td>Vinyl acetate</td>
<td>108-05-4</td>
<td>ACGIH TLV TWA: 10 ppm</td>
</tr>
<tr>
<td>1-Methyl-2-pyrrolidone</td>
<td>872-50-4</td>
<td>US WEEL TWA: 10 ppm</td>
</tr>
</tbody>
</table>

ENGINEERING CONTROLS: Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapor, or mist, use process enclosures, local exhaust ventilation, and other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

HYGIENE MEASURES: Wash hands, forearms, and face thoroughly with plenty of soap and water after handling chemical products, before eating, smoking, and using the restroom and at the end of the working period. Appropriate engineering, administrative, and other best practice decontamination control measures must be used to isolate contaminants on clothing and to prevent unintended migration of contaminants. Handle clothing and other potentially contaminated material appropriately and in compliance with local, state, and federal regulations in the process of removing, washing/cleaning, and reuse of these potentially contaminated materials. Ensure compliant use and location of eyewash station and safety showers.

PERSONAL PROTECTIVE EQUIPMENT (PPE):

EYE PROTECTION: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles and/or face shield.

SKIN PROTECTION: Personal protective equipment for the body should be selected based on the task being performed, the risks involved, and should be approved by an industrial hygiene specialist before handling this product.

HANDS PROTECTION: Chemical resistant gloves complying with applicable health and safety standards shall be worn when handling this product. Protective gloves are those made from butyl rubber, nitrile rubber, or polyvinyl alcohol. Appropriate hazard assessments in conjunction with an evaluation of the protection factors of chemical resistant gloves shall be performed to ensure the protective properties remain intact. It is noted that the time to breakdown of protection factors for different glove manufacturers varies. In the case of mixtures, the protection factors of chemical resistant gloves may be impacted and deteriorate at unpredictable rates without understanding the impact of the substance and the specific protection factors of the chemical resistant gloves.

RESPIRATORY PROTECTION: Ensure adequate ventilation. If the respirator is the sole means of protection, use a full-face supplied respirator. Use respirators and components tested and approved under appropriate government standards such as OSHA 29CFR 1910.134, NIOSH (US), or CEN (EU).

ENVIRONMENTAL EXPOSURE CONTROLS: Dispose of raw and spent materials and wastes in compliance with all local, state, and federal regulations to prevent potential environmental contamination. Industrial air monitoring may be required to determine any potential environmental hazards to the atmosphere. This monitoring may result in the use of engineering and administrative controls such as filtering and scrubbing systems to mitigate or eliminate potential contaminants.

### SECTION 10: STABILITY & REACTIVITY

**STABILITY:**
This product is stable under normal storage and use conditions.

**INCOMPATIBILITY:**
Strong reaction with oxidizing agents and excessive heat.

**HAZARDOUS REACTION:**
No specific data available.

**HAZARDOUS POLYMERIZATION:**
Hazardous polymerization will not occur under normal conditions of storage and use.

**CONDITIONS TO AVOID:**
Avoid moisture contamination in containers.

### SECTION 11: TOXICOLOGY INFORMATION

**ACUTE HEALTH EFFECTS:**

- **EYE CONTACT:** Not available.
- **SKIN CONTACT:** Not available.
- **INHALATION:** Not available.
- **INGESTION:** Not available.

**POTENTIAL CHRONIC EFFECTS:**

- **CHRONIC EFFECTS:** Not available.
- **TARGET ORGANS:** Contains material which causes damage to the adrenal gland, kidney, and liver.
- **CARCINOGENICITY:** Not available.
- **MUTAGENICITY:** In vitro genetic studies were negative. Animal genetic toxicity studies were negative.
- **TERATOGENICITY:** Has been toxic to the fetus in laboratory animals at doses toxic to the mother. Did not cause birth defects in laboratory animals.
- **FERTILITY EFFECTS:** In animal studies, did not interfere with reproduction.
- **DEVELOPMENTAL EFFECTS:** No known significant effects or critical hazards.
- **MEDICAL CONDITIONS AGGRAVATED BY OVER-EXPOSURE:** Overexposure may cause difficulty breathing and coughing.
SECTION 12: ECOLOGICAL INFORMATION

ENVIRONMENTAL EFFECTS: Based on a review of the individual components, this product has low ecotoxicity on aquatic organisms. The bioaccumulative potential is low and readily biodegradable.

SECTION 13: DISPOSAL CONSIDERATION

WASTE DISPOSAL: By-product wastes or process waste generation should be eliminated and/or minimized when possible. Do not dispose of any contaminants into sanitary sewer systems, storm drains, Publicly Owned Treatment Works (POTW), or any other municipal waste water treatment facility without written approval and agreements for processing wastes with such enterprises. Dispose of raw or unused materials, wastes, and/or by-products in accordance with all applicable local, state, and federal laws. Employ the expertise and knowledge of qualified personnel or contractors in disposal of any and all variants of this product. Ensure material containers are cleaned to the applicable standards before recycling, disposing, or reusing containers. Take special precautions to avoid any cross contamination and potential unknown effects from mixing with other substances. Refer to SECTION 8: EXPOSURE CONTROL/ PERSONAL PROTECTION of this document for personal protection requirements. Disposal to the environment or in violation of environmental protection laws and statutes must be prevented.

SECTION 14: TRANSPORT INFORMATION

PROPER SHIPPING NAME

DOT: Not regulated.
TDG: Not regulated.
IMDG: Not regulated.
IATA: Not regulated.

This product could potentially contaminate aquatic and terrestrial environments if not handled in accordance with all precautions, regulations, and laws. Users, transporters, and all other applicable entities must review, follow, and apply any and all necessary precautions and procedures to eliminate and/or minimize potential hazards or risks to aquatic or terrestrial environments.

SECTION 15: REGULATORY INFORMATION

U.S. Federal Regulations

TSCA 8b Inventory: All components are listed on the TSCA inventory or are exempt.
TSCA 5a (2): No components listed.
TSCA 5e: No components listed.
TSCA 12b: No components listed.
Clean Air Act Section 112(b) Hazardous Air Pollutants (HAPs): No components listed.
Clean Air Act - Ozone Depleting Substances (ODS): This product does not contain nor is it manufactured with ozone depleting substances.
SARA 313 Form R - Reporting Requirements: No components listed.
SARA 311/312 hazard identification: Delayed (chronic) health hazard.
CERCLA Hazardous substances: No components listed.

STATE REGULATIONS:

PENNSYLVANIA/NEW JERSEY/ MASSACHUSETTS - RTK: No components listed.
California Prop 65: This product contains no listed substances known to the State of California to cause cancer, birth defects, or other reproductive harm, at levels which would require a warning under the statute.

CANADA

WHMIS (Canada): WHMIS Class D-2A: Material causing other toxic effects (very toxic).
CEPA DSL: All components are listed or exempted.

This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations and the SDS contains all the information required by the Controlled Products Regulations.

INTERNATIONAL LISTS:

Australia inventory (AICS): All components are listed or exempted.
China inventory (IECSC): Not available.
Japan inventory: All components are listed or exempted.
Korea inventory: All components are listed or exempted.
New Zealand inventory of Chemicals (NZIoC): Not available.
Phillipines inventory (PICCS): Not available.
**Note:** The customer is responsible for determining the PPE code for this material. At the time of publishing, the NFPA/HMIS and the New GHS scale had opposite scales of severity. Check the most recent publications for current information.

**For Your Protection:**
The information and recommendations in this publication is to the best of our knowledge, reliable. The toxicity and risk characteristics of products made by SPI will necessarily differ from the toxicity and risk characteristics that occur when such products are used with other materials during a manufacturing process. The resulting risk characteristics should be determined and made known to ultimate end-users and processors. The user is responsible to comply with all applicable federal, provincial or municipal laws and regulations. SPI MAKES NO WARRANTIES OF ANY KIND, EXPRESSED OR IMPLIED, INCLUDING THOSE OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

**Preparation Information:**
This SDS supersedes ALL previous SDS versions.
