POLYSHIELD HT<sup>®</sup> TRAFFIC COAT "B" Component

Not available

SECTION 3: COMPOSITION/INFO	DRMATION ON INGREDIENTS						
CHEMICAL NAME		CAS NUMBER	% WEIGHT				
Polyoxypropylenediamine		9046-10-0	20-50				
N,N-dialkylamino-diphenylmethane		5285-60-9	10-30				
*Proprietary		Not available	10-30				
Diethylmethylbenzenediamine		68479-98-1	10-30				
· · · ·	ercentage (concentration) is withheld as a trade secret per	applicable regulations	s and statutes.				
SECTION 4: FIRST AID MEASUR	S						
EYE:	In case of contact with the eyes, rinse immediately for at least 15 minutes with plenty of water. Get medical attention if symptoms occur.						
SKIN:	Wash affected areas thoroughly with soap and water. Get medical attention if symptoms occur.						
INHALATION:	Remove the affected individual into fresh air and keep the person calm. Assist in breathing if necessary. Get medical attention if symptoms occur.						
INGESTION:	Rinse mouth and then drink plenty of water. Do not induce vomiting. Never induce vomiting or give anything by mouth if the victim is unconscious or having convulsions. Get medical attention if symptoms occur.						
NOTES TO PHYSICIAN:	Symptomatic and supportive therapy as needed. Follow should be monitored for 48 hours.	Symptomatic and supportive therapy as needed. Following severe exposure, medical follow-up should be monitored for 48 hours.					
SECTION 5: FIRE FIGHTING MEA	SURES						
FLASH POINT:	Not available.						
HAZARDS WHEN ON FIRE OR NEAR FLAME:	May produce toxic fumes of carbon dioxide and carbon monoxide when near heat source/flame. When in a closed container, pressure will increase which may lead to a rupture of the container.						
SUITABLE EXTINGUISHING MEDIA:	Dry chemical foam, carbon dioxide, foam, or water spray (mist/fog) to extinguish.						
UNSUITABLE EXTINGUISHING MEDIA:	None known.						
SPECIAL EXPOSURE HAZARDS:	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. If in a fire or heated, a pressure increase will occur and the container may rupture.						
SPECIAL PROTECTIVE EQUIPMENT FOR FIRE FIGHTERS:	Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. PVC boots, gloves, safety helmet and protective clothing should be worn.						
SECTION 6: ACCIDENTAL RELEA	SE MEASURES						
ACCIDENTAL RELEASE MEASURES:	For major spills call CHEMTREC: Toll free 1-800-424-930	<b>0</b> for international cal	1-703-527-3887.				
PERSONAL PRECAUTIONS:	Wear appropriate personal protective equipment recommended in SECTION 8: EXPOSURE CONTROL/ PERSONAL PROTECTION of this SDS. Immediately contact emergency personnel. Evacuate the area. Kee upwind avoiding inhalation of vapors. Clean-up should only be performed by trained personnel. People dealing with major spillages should wear full protective clothing including respiratory protection.						
ENVIRONMENTAL PRECAUTIONS:	This material may contaminate the environment without proper control and response to spills. Ensur spilled material does not come in contact with soil, waterway, drains, sewers, or other runoff that wou further disperse the material. Inform the relevant authorities if the product has caused environmenta pollution (sewers, waterways, soil, or air). Sources of ignition should be kept clear.						
METHODS FOR CONTAINMENT:	Use diking or capping to control migration. Contain and absorb large spillages with a non-flammable absorbent carrier (such as vermiculite, earth, or sand). DO NOT USE combustible materials such as sawdus Shovel into open-top drums or plastic bags for further decontamination, if necessary. Remove and properly dispose of residues. Dispose of via a licensed waste disposal contractor (See SECTION 13: DISPOSAL CONSIDERATIONS) Notify applicable government authorities if release is reportable.						
METHODS FOR CLEANING UP:	Only proceed with clean up by taking the appropriate personal protection measures required and ensure surrounding area does not contain further hazards that could worsen the spill, cause migration, or cause further harm (i.e. eliminate any ignition sources). Move any non-contaminated, non-leaking containers from the spill zone if it can be done safely. Dike, dam, or further restrict and stop active leaks without posing further damage or harm to individuals, the environment, and/or structures. Contain and collect spillage. See SECTION 13: DISPOSAL CONSIDERATIONS for disposal information and SECTION 8: EXPOSURE CONTROL/ PERSONAL PROTECTION for recommended Personal Protective Equipment (PPE). Obey all local, state, and federal regulations during clean up.						

SECTION 7: HANDLING & STOR	AGE
GENERAL:	Ideal storage temperature is 60-90°F (15-32°C). Handling and storage shall be in accordance with local, state/provincial, or federal regulations.
HANDLING:	Before opening this package, read and follow warning labels on all components. Avoid contact with the product or reaction mixture. Put on appropriate personal protective equipment. Use only with adequate ventilation to ensure that the occupational exposure limit is not exceeded, use respirator when ventilation is inadequate. Avoid breathing aerosols, mists, and vapors. (See SECTION 8: EXPOSURE CONTROL/ PERSONAL PROTECTION for details). Do not ingest. Eating, drinking, and smoking shall be prohibited in areas where this material is handled, stored, and processed. Workers shall wash hands and face before eating, drinking, and smoking. Persons with a history of skin sensitization problems, asthma, allergies, or chronic or recurrent respiratory disease should not be employed in any process in which this product is used. Do not get in eyes, on skin, or clothing. Keep in the original container or an approved alternative made from a compatible material. Keep tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse containers.
STORAGE:	Keep container tightly closed and properly sealed when stored. When possible, store product indoors in a dry, well-ventilated area. Store in original container, away from incompatible materials, and away from food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers and use appropriate containment to avoid environmental contamination.
SECTION 8: EXPOSURE CONTR	OLS/PERSONAL PROTECTION
EXPOSURE LIMITS:	As of the latest revision of this document, no known exposure limits exist for this product. The absence of current exposure data does not relieve an employer, user, or other to determine the specific hazards and appropriate exposure protection measures in the application and use of this product. Personal, workplace, atmospheric, and/or biological monitoring may be required to determine the effectiveness of engineering, administrative, and/or other best practice control measures. These monitoring results determine the need for and type of respiratory protective equipment, if any. Refer to the appropriate local, state, and federal regulations and statutes for the most current information and for guidance in the determination of hazardous conditions and the correlating personal protective equipment.
ENGINEERING CONTROLS:	Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapor, or mist, use process enclosures, local exhaust ventilation, and other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.
HYGIENE MEASURES:	Wash hands, forearms, and face thoroughly with plenty of soap and water after handling chemical products, before eating, smoking, and using the restroom and at the end of the working period. Appropriate engineering, administrative, and other best practice decontamination control measures must be used to isolate contaminates on clothing and to prevent unintended migration of contaminants. Handle clothing and other potentially contaminated material appropriately and in compliance with local, state, and federal regulations in the process of removing, washing/cleaning, and reuse of these potentially contaminated materials. Ensure compliant use and location of eyewash station and safety showers.
PERSONAL PROTECTIVE EQUIPMENT (	PPE):
EYE PROTECTION:	Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles and/or face shield.
SKIN PROTECTION:	Personal protective equipment for the body should be selected based on the task being performed, the risks involved, and should be approved by an industrial hygiene specialist before handling this product.
HANDS PROTECTION:	Chemical resistant gloves complying with applicable health and safety standards shall be worn when handling this product. Protective gloves are those made from butyl rubber, nitrile rubber, or polyvinyl alcohol. Appropriate hazard assessments in conjunction with an evaluation of the protection factors of chemical resistant gloves shall be performed to ensure the protective properties remain intact. It is noted that the time it takes to breakdown of protection factors of chemical resistant gloves may be impacted and deteriorate at unpredictable rates without understanding the impact of the substance and the specific protection factors of the chemical resistant gloves.
RESPIRATORY PROTECTION:	Ensure adequate ventilation. If the respirator is the sole means of protection, use a full-face supplied respirator. Use respirators and components tested and approved under appropriate government standards such as OSHA 29CFR 1910.134, NIOSH (US), or CEN (EU).
ENVIRONMENTAL EXPOSURE CONTROLS:	Dispose of raw and spent materials and wastes in compliance with all local, state, and federal regulations to prevent potential environmental contamination. Industrial air monitoring may be required to determine any potential environmental hazards to the atmosphere. This monitoring may result in the use of engineering and administrative controls such as filtering and scrubbing systems to mitigate or eliminate potential contaminants.

SECTION 9: PHYSICAL & C		TIES			
PHYSICAL STATE:	Liquid		FLASH POINT	:	Not available
COLOR:	Clear		AUTO-IGNITIC	ON TEMPERATURE:	Not available
ODOR:	Amine odor		DECOMPOSIT	TION TEMPERATURE:	Not available
ODOR THRESHOLD:	Not available		EXPLOSIVE L	IMITS:	Not explosive
pH:	Not applicable		FLAMMABILI	ΓY:	Not available
WATER SOLUBILITY:	Not available		BOILING POIN	NT:	Not available
PARTITION COEFFICIENT:	Not available		<b>BOILING RAN</b>	GE:	Not available
SPECIFIC GRAVITY:	0.995±0.005 g/cc @ 77°F	= (25°C)	MELTING/FRE	EZING POINT:	Not available
VISCOSITY:	475±50 mPa.s @ 77°F (2	5°C)	VAPOR PRES	SURE:	Not available
EVAPORATION RATE:	Not available		VAPOR DENS	ITY:	Not available
VOC:	Not available		RELATIVE DE	NSITY:	8.3±0.05 lbs/gal
SECTION 10: STABILITY &	REACTIVITY				
STABILITY:	Stable when handled an	d stored a	t temperatures	60-90°F (15-32°C).	
INCOMPATIBILITY:	Strong reaction with acid	ds and oxid	dizing agents.		
HAZARDOUS REACTION:	No specific data availabl	le.			
HAZARDOUS POLYMERIZATION:	Hazardous polymerizatio	on will not	occur under no	rmal conditions of storage	e and use.
CONDITIONS TO AVOID:	Avoid temperatures above	e 100°F (38	°C) and freezing	temperatures. Avoid moist	cure contamination in containers.
HAZARDOUS DECOMPOSITION:	Combustion of product wi	ill lead to o	xides of nitroger	n, carbon dioxide, and carbo	on monoxide being produced.
SECTION 11: TOXICOLOGY	INFORMATION				
ACUTE HEALTH EFFECTS:					
EYE CONTACT:	Not available.	Not available.			
SKIN CONTACT:	Not available.				
INHALATION:	Not available.				
INGESTION:	Not available.				
ACUTE TOXICITY:					
COMPONENT NAME	CAS NUMBER	LD <sub>50</sub> C	)ral (mg/kg)	LD <sub>50</sub> Dermal (mg/kg)	LC <sub>50</sub> Inhalation (mg/L/4hrs)
Polyoxypropylenediamine	9046-10-0	2,8	385 (rat)	2,980 (rabbit)	0.37 (rat)
Diethylmethylbenzenediamine	68479-98-1	7:	38 (rat)	>2,000 (rabbit)	Not available
N,N-dialkylamino-diphenylmethane	5285-60-9	1,3	880 (rat)	3,090 (rabbit)	Not available
POTENTIAL CHRONIC EFFECTS:					
CHRONIC EFFECTS:	A two year study on rats showed that diethylmethylbenzenediamine caused effects in the pancreas, liver, thyroid, and eyes. There was an increase in the number of tumors in the liver and thyroid of male rats. An increase in the number of tumors in the liver and possibly mammary glands of female rats was also found.				
TARGET ORGANS:	Pancreas, liver, thyroid, and eyes.				
CARCINOGENICITY:	As of this publication, this material is not listed on the National Toxic Program (NTP) Report of Carcinogens. Please refer to the most recent information with NTP.				
MUTAGENICITY:	No known significant eff	fects or cri	tical hazards.		
TERATOGENICITY:	No known significant eff	fects or cri	tical hazards.		
FERTILITY EFFECTS:	No known significant eff	fects or cri	tical hazards.		
DEVELOPMENTAL EFFECTS:	No known significant eff	fects or cri	tical hazards.		
MEDICAL CONDITIONS AGGRAVATED BY OVER-EXPOSURE:	No known significant eff	fects or cri	tical hazards.		

SECTION 12: ECOLOGICAL	INFC	ORMATION				
ENVIRONMENTAL EFFECTS:	E	Based on a review of the individual compon nay cause long-term adverse effects in the	ents, this product may be immed aquatic environment, and not rea	iately harmful to aquatic organisms, adily biodegradable.		
SECTION 13: DISPOSAL CO	ONSIE	DERATION				
		By-product wastes or process waste generation should be eliminated and/or minimized when possible. Do not dispose of any contaminants into sanitary sewer systems, storm drains, Publicly Owned Treatment Works (POTW), or any other municipal waste water treatment facility without written approval and agreements for processing wastes with such enterprises. Dispose of raw or unused materials, wastes, and/or by-products in accordance with all applicable local, state, and federal laws. Employ the expertise and knowledge of qualified personnel or contractors in disposal of any and all variants of this product. Ensure material containers are cleaned to the applicable standards before recycling, disposing, or reusing containers. Take special precautions to avoid any cross contamination and potential unknown effects from mixing with other substances. Refer to SECTION 8: EXPOSURE CONTROL/ PERSONAL PROTECTION of this document for personal protection requirements. Disposal to the environment or in violation of environmental protection laws and statutes must be prevented.
