CHEMICAL NAME		CAS NUMBER	% WEIGHT		
Polyoxypropylenediamine		9046-10-0	30-60		
Proprietary	Not available	10-30			
Diethylmethylbenzenediamine	68479-98-1	10-30			
Proprietary	Not available	1-10			
Glyceryl poly (oxypropylene) triamine	64852-22-8	1-10			
Proprietary		Not available	1-10		
<sup>•</sup> The specific chemical identity and exact	percentage (concentration) is withheld as a trade see	cret per applicable regulation	ns and statutes.		
SECTION 4: FIRST AID MEASUR	RES				
EYE:	In case of contact with the eyes, rinse immediately for at least 15 minutes with plenty of wate Get medical attention if symptoms occur.				
SKIN:	Wash affected areas thoroughly with soap and wa	ater. Get medical attention if	symptoms occur.		
INHALATION:	Remove the affected individual into fresh air and keep the person calm. Assist in breathing if necessary. Get medical attention if symptoms occur.				
INGESTION:	Rinse mouth and then drink plenty of water. Do not induce vomiting. Never induce vomiting or give anything by mouth if the victim is unconscious or having convulsions. Get medical attention if symptoms occur.				
NOTES TO PHYSICIAN:	Symptomatic and supportive therapy as needed. Following severe exposure, medical follow-up should be monitored for 48 hours.				
SECTION 5: FIRE FIGHTING ME	ASURES				
FLASH POINT:	352°F (178°C).	352°F (178°C).			
HAZARDS WHEN ON FIRE OR NEAR FLAME:	May produce toxic fumes of carbon dioxide and ca When in a closed container, pressure will increase				
SUITABLE EXTINGUISHING MEDIA:	Dry chemical foam, carbon dioxide, foam, or wate	r spray (mist/fog) to extinguis	h.		
UNSUITABLE EXTINGUISHING MEDIA:	None known.				
SPECIAL EXPOSURE HAZARDS:	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. If in a fire heated, a pressure increase will occur and the container may rupture.				
SPECIAL PROTECTIVE EQUIPMENT FOR FIRE FIGHTERS:	Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. PVC boots, gloves safety helmet and protective clothing should be worn.				
SECTION 6: ACCIDENTAL RELEA	ASE MEASURES				
ACCIDENTAL RELEASE MEASURES:	For major spills call CHEMTREC: Toll free 1-800-4 1-703-527-3887	24-9300 for international ca	II		
PERSONAL PRECAUTIONS:	Wear appropriate personal protective equipment recommended in SECTION 8: EXPOSURE CONTROL/ PERSONAL PROTECTION of this SDS. Immediately contact emergency personnel. Evacuate the area. K upwind avoiding inhalation of vapors. Clean-up should only be performed by trained personnel. People dealing with major spillages should wear full protective clothing including respiratory protection.				
ENVIRONMENTAL PRECAUTIONS:	This material may contaminate the environment without proper control and response to spills. Ensur spilled material does not come in contact with soil, waterway, drains, sewers, or other runoff that wou further disperse the material. Inform the relevant authorities if the product has caused environmenta pollution (sewers, waterways, soil, or air). Sources of ignition should be kept clear.				
METHODS FOR CONTAINMENT:	Use diking or capping to control migration. Contain and absorb large spillages with a non-flammable absorbent carrier (such as vermiculite, earth, or sand). DO NOT USE combustible materials such as saw Shovel into open-top drums or plastic bags for further decontamination, if necessary. Remove and prodispose of residues. Dispose of via a licensed waste disposal contractor (See SECTION 13: DISPOSAL CONSIDERATIONS) Notify applicable government authorities if release is reportable.		als such as sawdus move and properly		
METHODS FOR CLEANING UP:	Only proceed with clean up by taking the appropriate ensure surrounding area does not contain further has or cause further harm (i.e. eliminate any ignition sourc containers from the spill zone if it can be done safely. leaks without posing further damage or harm to indiv Contain and collect spillage. See SECTION 13: DISPO and SECTION 8: EXPOSURE CONTROL/ PERSONAL Protective Equipment (PPE). Obey all local, state, and	zards that could worsen the sp ces). Move any non-contamina Dike, dam, or further restrict a iduals, the environment, and/c DSAL CONSIDERATIONS for d PROTECTION for recommend	vill, cause migratior ated, non-leaking and stop active or structures. isposal informatior ded Personal		

SECTION 7: HANDLING & STOR	AGE
GENERAL:	Ideal storage temperature is 60-90°F (15-32°C). Handling and storage shall be in accordance with local, state/provincial, or federal regulations.
HANDLING:	Before opening this package, read and follow warning labels on all components. Avoid contact with the product or reaction mixture. Put on appropriate personal protective equipment. Use only with adequate ventilation to ensure that the occupational exposure limit is not exceeded, use respirator when ventilation is inadequate. Avoid breathing aerosols, mists, and vapors. (See SECTION 8: EXPOSURE CONTROL/ PERSONAL PROTECTION for details). Do not ingest. Eating, drinking, and smoking shall be prohibited in areas where this material is handled, stored, and processed. Workers shall wash hands and face before eating, drinking, and smoking. Persons with a history of skin sensitization problems, asthma, allergies, or chronic or recurrent respiratory disease should not be employed in any process in which this product is used. Do not get in eyes, on skin, or clothing. Keep in the original container or an approved alternative made from a compatible material. Keep tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse containers.
STORAGE:	Keep container tightly closed and properly sealed when stored. When possible, store product indoors in a dry, well-ventilated area. Store in original container, away from incompatible materials, and away from food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers and use appropriate containment to avoid environmental contamination.
SECTION 8: EXPOSURE CONTR	OLS/PERSONAL PROTECTION
EXPOSURE LIMITS:	As of the latest revision of this document, no known exposure limits exist for this product. The absence of current exposure data does not relieve an employer, user, or other to determine the specific hazards and appropriate exposure protection measures in the application and use of this product. Personal, workplace, atmospheric, and/or biological monitoring may be required to determine the effectiveness of engineering, administrative, and/or other best practice control measures. These monitoring results determine the need for and type of respiratory protective equipment, if any. Refer to the appropriate local, state, and federal regulations and statutes for the most current information and for guidance in the determination of hazardous conditions and the correlating personal protective equipment.
ENGINEERING CONTROLS:	Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapor, or mist, use process enclosures, local exhaust ventilation, and other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.
HYGIENE MEASURES:	Wash hands, forearms, and face thoroughly with plenty of soap and water after handling chemical products, before eating, smoking, and using the restroom and at the end of the working period. Appropriate engineering, administrative, and other best practice decontamination control measures must be used to isolate contaminates on clothing and to prevent unintended migration of contaminants. Handle clothing and other potentially contaminated material appropriately and in compliance with local, state, and federal regulations in the process of removing, washing/cleaning, and reuse of these potentially contaminated materials. Ensure compliant use and location of eyewash station and safety showers.
PERSONAL PROTECTIVE EQUIPMENT	(PPE):
EYE PROTECTION:	Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles and/or face shield.
SKIN PROTECTION:	Personal protective equipment for the body should be selected based on the task being performed, the risks involved, and should be approved by an industrial hygiene specialist before handling this product.
HANDS PROTECTION:	Chemical resistant gloves complying with applicable health and safety standards shall be worn when handling this product. Protective gloves are those made from butyl rubber, nitrile rubber, or polyvinyl alcohol. Appropriate hazard assessments in conjunction with an evaluation of the protection factors of chemical resistant gloves shall be performed to ensure the protective properties remain intact. It is noted that the time it takes to breakdown of protection factors of chemical resistant gloves manufacturers varies. In the case of mixtures, the protection factors of chemical resistant gloves may be impacted and deteriorate at unpredictable rates without understanding the impact of the substance and the specific protection factors of the chemical resistant gloves.
RESPIRATORY PROTECTION:	Ensure adequate ventilation. If the respirator is the sole means of protection, use a full-face supplied respirator. Use respirators and components tested and approved under appropriate government standards such as OSHA 29CFR 1910.134, NIOSH (US), or CEN (EU).
ENVIRONMENTAL EXPOSURE CONTROLS:	Dispose of raw and spent materials and wastes in compliance with all local, state, and federal regulations to prevent potential environmental contamination. Industrial air monitoring may be required to determine any potential environmental hazards to the atmosphere. This monitoring may result in the use of engineering and administrative controls such as filtering and scrubbing systems to mitigate or eliminate potential contaminants.

SECTION 9: PHYSICAL & C		TIES			
PHYSICAL STATE:	Liquid	1	FLASH POINT	:	342°F (172°C)
COLOR:	Yellow	1	AUTO-IGNITIC	ON TEMPERATURE:	No Data
ODOR:	Amine odor	1	DECOMPOSIT	ION TEMPERATURE:	No Data

VISCOSITY:	550±55 mPa.s @ 77°F (2	5°C) '	VAPOR PRES	SURE:	No Data
EVAPORATION RATE:	No Data		VAPOR DENS	ITY:	No Data
VOC:	0 g/L	1	RELATIVE DEI	NSITY:	8.30±0.05 lbs/gal
SECTION 10: STABILITY &	REACTIVITY				
STABILITY:	Stable when handled an	d stored at	temperatures	60-90°F (15-32°C).	
INCOMPATIBILITY:	Strong reaction with acids and oxidizing agents.				
HAZARDOUS REACTION:	No specific data availabl	le.			
HAZARDOUS POLYMERIZATION:	Hazardous polymerization will not occur under normal conditions of storage and use.				
CONDITIONS TO AVOID:	Avoid temperatures above 100°F (38°C) and freezing temperatures. Avoid moisture contamination in containers.				
HAZARDOUS DECOMPOSITION:	Combustion of product will lead to oxides of nitrogen, carbon dioxide, and carbon monoxide being produced.				
SECTION 11: TOXICOLOGY	INFORMATION				
ACUTE HEALTH EFFECTS:					
EYE CONTACT:	Not available.				
SKIN CONTACT:	Not available.				
INHALATION:	Not available.				
INGESTION:	Not available.				
ACUTE TOXICITY:					
COMPONENT NAME	CAS NUMBER	LD <sub>50</sub> Or	al (mg/kg)	LD <sub>50</sub> Dermal (mg/kg)	LC <sub>50</sub> Inhalation (mg/L/4hrs)
Polyoxypropylenediamine	9046-10-0	2,88	85 (rat)	2,980 (rabbit)	0.37 (rat)
Diethylmethylbenzenediamine	68479-98-1	73	8 (rat)	>2,017 (rat)	Not available
Glyceryl poly (oxypropylene) triamine	64852-22-8	2,69	90 (rat)	12,500(rabbit)	Not available
POTENTIAL CHRONIC EFFECTS:					
CHRONIC EFFECTS:	A two year study on rats showed that diethylmethylbenzenediamine caused effects in the pancreas, liver, thyroid, and eyes. There was an increase in the number of tumors in the liver and thyroid of male rats. An increase in the number of tumors in the liver and possibly mammary glands of female rats was also found.				
TARGET ORGANS:	Pancreas, liver, thyroid, and eyes.				
CARCINOGENICITY:	As of this publication, th Carcinogens. Please re			the National Toxic Progra ormation with NTP.	m (NTP) Report of
MUTAGENICITY:	No known significant eff	fects or criti	ical hazards.		
TERATOGENICITY:	No known significant eff	fects or criti	ical hazards.		
FERTILITY EFFECTS:	No known significant eff	fects or criti	ical hazards.		
DEVELOPMENTAL EFFECTS:	No known significant eff	fects or criti	ical hazards.		
MEDICAL CONDITIONS AGGRAVATED BY OVER-EXPOSURE:	No known significant eff	fects or criti	cal hazards.
